Rules of the game

- In this game, which allows for an unlimited number of players, you can play with both value and colored chips. (Colored chips are purchased and redeemed at the same table. As a player, you decide which value is visible to all. You can use only the selected color.)
- You can continue placing bets until the dealer has completed the betting phase by stopping the game.
- If the ball lands on 0 (zero), all bets on the even chances will be locked.

How to play

- The dealer opens the betting phase.
- You can then place your chips on the desired position(s), combination(s) and color.
- The dealer announces that the betting phase is over.
- As soon as the ball lands, the dealer announces the winning number (indicated by the placement of the Dolly) and pays out all the chances for the winning number.
- After this, a new round begins.
