

What is Roulette Xtra?

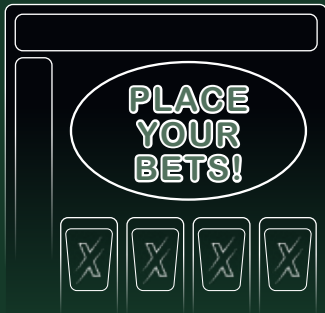

Roulette Xtra combines classic roulette gameplay with an extra thrill: In each game round, four random numbers are selected and assigned a **multiplier between 50× and 200×**. This means you can win up to **200 times your bet**.

Game Sequence

The game is played in **three phases**:

1. Betting Phase

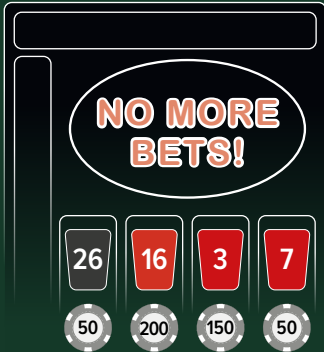

Place your bets as usual (inside/outside bets, neighbours, series). The dealer sets the ball in motion.

2. Xtra Selection

Shortly before the ball drops, **“No More Bets”** appears on the display. The betting phase is now closed. Next, **four random Xtra numbers are selected and shown on the screen.**

Each of these numbers is assigned a random multiplier between 50:1 and 200:1.

3. Payout

Once the ball has come to rest, the payout phase begins. The dealer checks the result and pays all winning bets according to the game rules. If the ball lands on one of the four previously selected Xtra numbers, the displayed multiplier is applied. If the ball lands on a different number, straight-up bets on that number receive the regular payout of 30 : 1.

The Aim of Roulette Xtra

Place your bet on the number you believe the ball will land on.
If it happens to be one of the four randomly selected Xtra numbers,
the displayed multiplier is applied.

How to Place Your Bets?

Just like in classic roulette, you place your bets on the number you believe the ball will land on.

All familiar bet types – **inside and outside bets, neighbours, and series** – remain fully available.
