Slot Machines

At Swiss Casinos, you'll find a wide selection of slot machines featuring different themes, functions and jackpots. Despite their variety, all slot machines follow the same basic principle: **they are modern electronic devices that function entirely randomly.**

Every machine is regularly tested for proper functionality and legal compliance, and is monitored by the Swiss Federal Gaming Board (SFGB).

Types of Slot Machines

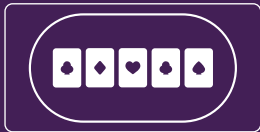

Reel Slots

Classic slot machines with mechanical reels and either a lever or a start button to begin the game.

Video Slots

The reels are displayed on a screen. These machines often feature engaging animations, additional functions and bonus games.

Virtual Table Games

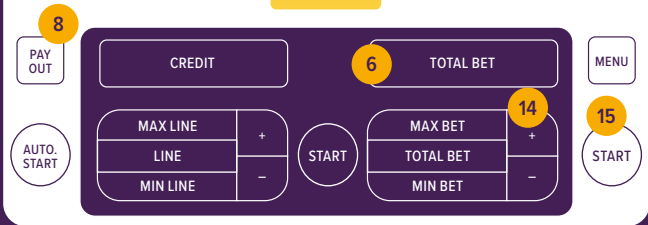

These are electronic versions of well-known casino games such as Bingo, Roulette, Poker or Blackjack.

Jackpots

There are different types of jackpots. Progressive jackpots grow with every game played and can be won only by hitting a specific reel combination or bonus outcome. Mystery jackpots, on the other hand, can be won with any reel combination.

All slot machines operate according to the same basic principles, though the arrangement of buttons may vary depending on the device.

Betting

Slot machines have one or several paylines. If the symbols along an active payline form a winning combination, you receive a payout.

The more paylines you activate, the higher your chance of hitting a winning combination – and the higher your total bet. You can choose how many lines you want to play.
